

JERIKHO RUBEN RAHMANI

Serpong, Tangerang Selatan | Jerikhorr@gmail.com
+628118471317 | [linkedin.com/in/jerikho-ruben](https://www.linkedin.com/in/jerikho-ruben)

Informatics undergraduate with a strong interest in web development and hands-on experience using HTML, CSS, JavaScript, React, and Tailwind. Skilled in building, updating, and maintaining front-end features through practical projects and self-directed learning. Familiar with SQL/MySQL databases, PHP fundamentals, and Git-based version control. Experienced in debugging, basic testing, and writing clear project documentation. A proactive and detail-oriented problem-solver with strong communication and cross-functional collaboration skills, eager to learn to modern web development tasks and support internal digital tools through an internship opportunity.

EDUCATION

Universitas Multimedia Nusantara, Tangerang

Aug 2023 – Aug 2027 (Expected)

Bachelor of Computer Science

GPA 3.59 of 4.00

ORGANISATIONAL EXPERIENCE

INFINITE 2024

Dec 2023 – Dec 2024

INFINITE 2024 is the flagship annual event for Informatics students, serving as the closing event for HMIF's main activity series.

Logistic Division

- Supported venue setup and teardown for both technical and non-technical equipment to ensure smooth event operations
- Managed and organized event logistics, including preparation, allocation, and tracking of equipment and materials
- Contributed to overall event success by maintaining operational efficiency, accuracy, and strong teamwork throughout the execution phase.

PROJECT

E-Commerce Front-End Website (Mini Project)

Aug 2025 – Oct 2025

Web Developer

- Built core front-end features for an e-commerce website, including product listing, product detail pages, and a functional shopping cart.
- Implemented interactive UI logic such as add-to-cart, quantity updates, and real-time price calculation using JavaScript and DOM manipulation
- Designed responsive front-end layouts to ensure consistent usability across different devices and screen sizes

Warehouse Management Database System (Alfamart Case Study)

Nov 2024 – Dec 2024

Database Developer

- Developed a well-structured relational database schema and implemented SQL features such as JOIN, VIEW, filtering, grouping, and sorting to support operational reporting and data validation.
- Ensured data accuracy and consistency by applying normalization principles and defining clear table relationships for stock tracking, order processing, and inventory audit records
- Ensured data consistency by applying normalization principles and establishing clear table relationships

React + Express Web Application

Ongoing

Tech: React, Tailwind, Express.js

- Developing UI components in React while implementing basic server-side logic in Express.js for cart handling and API endpoints.

- Built add-to-cart and item update functionality using REST API communication between React and Express
- Preparing for database integration to support persistent cart and multi-user functionality

LANGUAGES AND SKILLS

- **Languages:** Bahasa Indonesia (Native), English (Limited Working Proficiency)
- **Technical Skills:** HTML, CSS, JavaScript, React, Tailwind, Python (Basic), PHP (Basic), SQL, MySQL, Microsoft Excel
- **Certifications:** Data Classification and Summarization Using IBM Granite (IBM), HCIA-AI V3.5 (Huawei), Intro to Software Engineering (RevoU), Python Intermediate (Sololearn).
- **Soft Skills:** Eager to learn, Communicative, Collaborative, Detail-Oriented, Analytical Thinking, Problem Solving, Proactive, Disciplined
